

- Data is posted (shared)...
- A paper is published...
  - => all social actions
  - technically: new IDs get generated and made available
  - URLs accessible

- Report about “sharing”
- Formally:
  - Citation (usable, path to source can be steep)
  - DOI (clickable!)
  - Publication list
  - Reports
- Informally?
  - “you can find this...”
  - in emails, chats, social nets
  - send URL
    - ... and hope it will work

# What can we do?

- Assemble relevant standards
- And showcase best-practice relevant for RD
  
- Assess *solutions* that are found all around
  - (e.g. publishers' invitation to Google)
  - Review relevance of standards
  
- Why research data?
  - different access model
  - importance of interfaces and interoperability to make it more effective to act through the forest of available research
